

Deaf or Hard of Hearing Smoke Alarm Aid

The devices provided and installed by Louisville Fire are designed to work in conjunction with a properly installed and working smoke alarm in your home to alert a sleeping individual of a fire.

Once a smoke alarm is activated, the device identifies the alarm and activates a bed shaker, a loud audible alarm, and a visual flashing light to alert a sleeping person who may not be able to hear their smoke alarm activation.

Features:

- Intermittent bed shaker
- Low Frequency 520 Hz audible alarm
- Operational indicator lights
- Plug-in power supply with battery backup
- Large test button
